Job description / Tasks to be developed:

The objective of the CoALeS project, funded by La Marató de TV3, is to use machine learning (ML) to improve outcomes in babies with aortic coarctation, by phenotyping individuals, using cardiovascular and neurological data. To do that we aim to use interpretable ML to manage study candidates with CoA, using similarity of complex data (imaging, biomarkers, neurological monitoring, and clinical information), to phenotype individuals, and to study clinical trajectories. The aim is to develop a cloud-based clinician-friendly tool to capture information and decision support, to understand the relations between cardiovascular disease and neurological parameters together with treatment and outcome information, in study candidates with CoA, through data integration using interpretable and contemporary machine learning.
