

R2A-Postdoctoral Researcher (G1) at the Hepatic Oncology research group.

Code: FU-420/2024

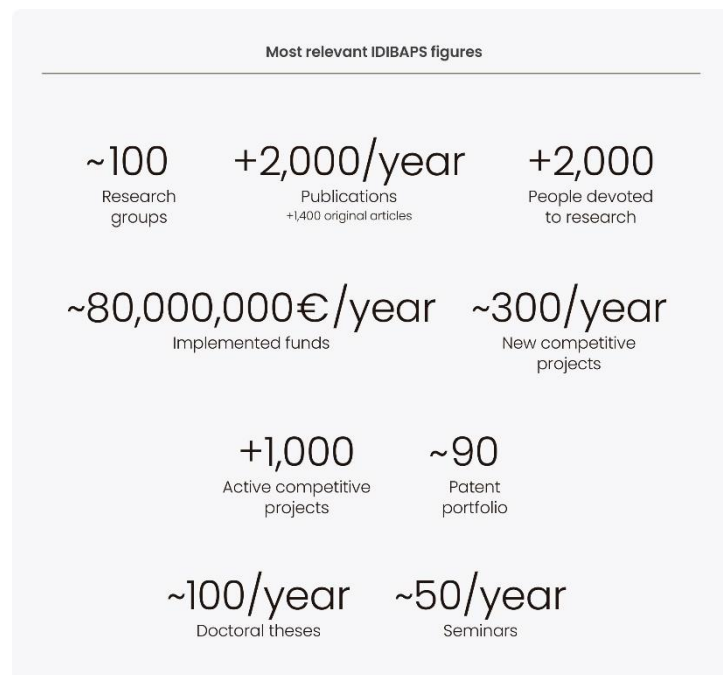

About the institution

The Barcelona Clinical Research Foundation-August Pi i Sunyer Biomedical Research Institute (IDIBAPS) is a biomedical research centre of excellence, located on the Barcelona Clinic Campus and with a clear international focus.

The IDIBAPS research community includes over 2,000 professionals and a hundred multidisciplinary groups that carry out high-impact translational research aimed at addressing biological and clinical questions relevant to human health, as evidenced by the more than 1,500 original articles published each year that make the institution one of the main biomedical research centres in Spain.

The Clínic Campus offers a high-level research and innovation environment, which includes the Hospital Clínic of Barcelona, a referral hospital committed to care, research and teaching, which covers practically all medical and surgical specialities, plus the University of Barcelona's Faculty of Medicine and Health Sciences. The latter dates from 1843 and is today one of the most prestigious health sciences faculties in Spain and worldwide.

Since 2015, IDIBAPS has had [HR Excellence in Research](#) accreditation from the European Commission. It is a CERCA centre and is accredited as a Health Research Institute by the Carlos III Health Institute (ISCIII).

Job description

- Develop and validate radiomics/AI model using state-of-the-art techniques based on CT images to optimize HCC immunotherapy.
- Drive and run radiomics/AI and liver cancer immunotherapy projects.
- Mine imaging information from daily used CT/MRI images for HCC prognosis prediction.
- Support and supervise graduate and predoctoral students.
- Apply for external funding - both national and international.
- Actively participate in academic, industry and health care collaboration involving omics-based methods to improve HCC prognosis.

Required qualifications

- PhD In Medicine, Biology, Bioinformatics, Computer Science or Related.
- Master Related with Liver Cancer.

Experience and knowledge

- Interdisciplinary background of BOTH AI and clinical work experience.
- Minimum of 2-year experience developing or collaborating in radiomics/AI projects.
- Previous experience of clinical work, cancer research, and patient derived materials.
- Very good knowledge of imaging analysis and imaging biomarker development.
- Experience of project management and leadership.
- Experience of collaboration between different disciplines.
- A proven academic track record, including recent first-author publications.
- Good knowledge of English, oral and written. No certificate needed.
