

2024 IDIBAPS SEMINARS

Venue
Esteve Auditorium
IDIBAPS-CEK Building
Rosselló 149-153, Barcelona
seminaris@recerca.clinic.cat

IDIBAPS SEMINAR
IDIBAPS IN-HOUSE SEMINAR
IDIBAPS CORE FACILITY SEMINAR
IDIBAPS LIVER SEMINARS

January 31

Spatial single-cell metabolomics reveals metabolic cell states

Theodore Alexandrov, PhD

Group leader of the Spatial and single-cell metabolomics. European Molecular Biology Laboratory (EMBL), Barcelona

February 21

MACSima™ Imaging Platform: a complete workflow for spatial biology

Luis Muñoz, PhD

Imaging Specialist, Miltenyi Biotec Spain

February 28

The puzzle of liver succinate receptor: influence on liver health and MASLD

Sonia Fernández-Veledo, PhD

Group leader of the Diabetes and Metabolic Associated Diseases (DIAMET). Institut d'Investigació Sanitària Pere Virgili (IISPV), Tarragona

March 14

The antibody-innate immunity cross talk in brain infections and autoimmunity

Marianna Spatola, MD, PhD

IDIBAPS Junior Researcher. Pathogenesis of autoimmune neuronal disorders

March 19

B cell receptor - the ultimate driver of mature B cell malignancies

Kostas Stamatopoulos MD, PhD

Institute of Applied Biosciences (INAB/CERTH), Greece

March 20

Pathophysiological mechanisms and regulation of Metabolic dysfunction-Associated Steatotic Liver Disease

Bart Staels, PhD

Full Professor, University of Lille, France

April 11

From the origins to the future of metabolic dysfunction-associated steatotic liver disease

Dina Tiniakos MD, PhD

Professor of Pathology & Director Department of Pathology. National & Kapodistrian University of Athens, Greece

April 17

Workshop: Single Cell Multiomics

Aida Freire Valls, PhD

Single Cell Solution Architect
BD Biosciences

April 22

Tracking malignant lymphocytes plasticity in B and T cell lymphomas through single-cell analyses

Pierre Milpied, PhD

Centre d'Immunologie de Marseille-Luminy, France

May 22

A new dimension of immune profiling with ELISpot and FluoroSpot analysis on IRIS 2

Maria Karvouni, PhD

Field Application Specialist

Carles Solà, PhD

Head of Sales EMEA & APAC

May 22

Obesity, the end of the beginning

Jeffrey Friedman, MD, PhD
The Rockefeller University, USA

May 28

Competitive access to large-scale national and international HPC and Data Management resources

Oriol Pineda, PhD
*Head of Infrastructure Access
 Barcelona Supercomputing Center*

June 19

Discovery of liver disease therapeutics and targets using prognostic gene signatures

Thomas F. Baumert MD
Director, Institute of Translational Medicine and Liver Disease, Inserm U1110, France. Director, Laboratory of Excellence HepSYS, University of Strasbourg, France. Chief, Gastroenterology Service, Strasbourg University Hospitals, France.

July 1

Mapping the development of the immune system one cell at a time

Roser Vento-Tormo, PhD
Wellcome Sanger Institute, Cambridgeshire, UK

July 9

Secondary use of clinical data

Xavier Borrat, MD, PhD
*Head of Clinical Informatics
 Department, HCB*

October 17

Changes in the nervous system: across millions of years, across two weeks

Hernando Martínez-Vergara, PhD
*IDIBAPS Junior Researcher.
 Cortical circuit dynamics*

October 23

Parse biosciences single cell grant program seminar

Daniela Scocchia
Technical Sales Manager

Natalia Juiz, PhD
*Senior Field Application Scientist
 Parse Biosciences*

October 24

KRAS: from epitopes to adoptive cell therapies

Beatriz M. Carreno, PhD
University of Pennsylvania, USA

November 8

Technical seminar on light-sheet microscopy: the UltraMicroscope Blaze

Luis Muñoz, PhD
*Imaging Specialist,
 Miltenyi Biotec Spain*

November 25

Spatial biology in action: driving precision medicine with GeoMx-DSP technology

Bernat Coll-Martínez, PhD
*Product Specialist, Research Unit
 Diagnostica Longwood*

December 12

Understanding how mutant cells colonize normal epithelia

Albert Herms, PhD
*IDIBAPS Postdoctoral Researcher.
 Lipid trafficking and disease*
